

## COMPANY

In 1986, Wayne Lowe and Byron Middendorf founded Equinox Information Systems because they wanted to create a great work environment. Since that time, more than 360 telecommunications companies have trusted Equinox for revenue protection and optimization solutions. Equinox currently processes a billion usage records every day for customers across all segments of the telecom industry to address profitability and network efficiency issues, including data mediation, fraud management, revenue/expense management, routing assurance, usage analytics, network analysis, and custom application development. Equinox is privately held, profitable, and debt-free. As of 2015, it is an employee owned company (ESOP).
